

S.A.G.E. Therapy Center

Local SEO Site Architecture & Knowledge Graph

Prepared: July 20, 2026 — Lilos Growth **Market:** North County San Diego, California

Primary location: 5055 Avenida Encinas, Suite 100, Carlsbad, CA 92008 **Migration type:**

Full site replacement — sagetherapycenter.com moves entirely from Squarespace to a new Astro build. The old platform will not remain live as a fallback after DNS cutover.

Publication status: Architecture-ready. Do not publish unverified insurance, GBP-category, review-count, or founding-date claims. A licensure claim (LMFT, LIC# MFC 39586) is sourced directly from the practice's own existing bio copy but should get a final confirmation from Kristin before it goes into schema. Full launch gate at the end of this document. A separate build/publish timeline governs sequencing and is not part of this document.

Executive Decision

Build a **service-led site with eight city hubs and a research-gated subset of city/service pages** — not a full 20-service × 8-city grid (which would produce 160 largely repetitive pages, real doorway-page risk, and more ongoing content than a solo practitioner can sustain authentically). This scope decision is final.

Launch architecture:

- 20 canonical service pages under </services/>
 - 8 city hubs at root level: Carlsbad (primary), Encinitas, San Marcos, Oceanside, Vista, Del Mar, Solana Beach, Rancho Santa Fe
 - An initial approved city/service matrix, weighted toward Carlsbad and the two cities carrying real backlink equity (Encinitas, San Marcos)
 - 6 named neighborhoods (La Costa, Olde Carlsbad, Olivenhain, Bressi Ranch, Aviara, Calavera Hills) used as sections and internal-link destinations, not standalone pages at launch
 - 1 primary conversion page: </schedule-a-session/>
 - Supporting pages: </about/>, </faq/>, </contact/>, </resources/>, </blog/>, privacy and accessibility pages
 - Every money page reachable in ≤3 clicks
 - **Full redirect coverage for every legacy URL this research confirmed** (13+ pages — see Section E), not just the two equity-carrying ones, because this is a full replacement with no old server left to catch anything missed
-

SERP Landscape Summary

1. **Psychology Today dominates the Carlsbad marriage/couples counseling SERP.** Its category-filtered directory pages rank prominently for both "marriage counseling Carlsbad" and "couples counseling Carlsbad."
[psychologytoday.com/us/therapists/ca/carlsbad]
2. **Independent solo practitioners compete with lean, single-focus sites, not large city matrices.** Lynn Erwin MFT, Carlsbad Christian Counseling, and Kristin's Comfy Couch (a different practitioner, Kristin Perry MFT — see naming note below) all run single-location sites built around one clear identity.
[lynnnerwinmft.com; carlsbadchristiancounseling.com; kristinscomfycouch.com]
3. **At least one larger competitor already uses a /locations/{city}/{service}/pattern — sandiegotherapist.com has a live /locations/carlsbad/marriage-counselor/ page, direct precedent for the architecture below.**
[sandiegotherapist.com/locations/carlsbad/marriage-counselor/]
4. **Credentials and first-person framing rank well.** The strongest competitor pages lead with license type, years practicing, and direct voice ("I have worked in Carlsbad for over 20 years") rather than corporate phrasing.
5. **S.A.G.E.'s modality breadth is a genuine differentiator.** Most competitors mention 2–3 approaches; Kristin's six-plus (EMDR, Lifespan Integration, CBT, IMAGO, Psychodynamic, Attachment-based) is broader than most local competitors' and is currently under-surfaced, buried in an approach section rather than led with.
6. **FAQ content clusters around cost, process, and fit** — insurance/fee questions, "how do I get my partner to go to therapy," and first-session logistics recur across competitor and directory content.
7. **Directories win on filtering; practice sites have to win on specificity a directory can't offer** — real photos, a real address story, real availability.
8. **S.A.G.E.'s own historical content has real topical depth** (grief, PTSD, triggers, a self-love series) but is fragmented across at least three different URL eras from prior site restructurings — recoverable value if consolidated, not dead weight.
9. **The current city-page network is a liability in its present form, not an asset.** At least 13 near-identical templated pages exist across cities with duplicated boilerplate paragraphs and keyword-stuffed footer text — the exact doorway-page pattern search engines penalize. Two of these pages (Encinitas, San Marcos) carry confirmed real backlink equity worth preserving through a redirect; the pattern itself should not be replicated in the new build.
10. **The correct competitive position is "solo practitioner with unusually broad clinical training, presented with directory-beating specificity and real local trust signals"** — not page volume.

SERP Intent Distribution

Intent	What the user expects	Recommended page type
Commercial investigation	Provider fit, methods, experience, fees, location	Service pillar, city/service page
Transactional	Call, request session, directions	City hub, schedule page, contact page
Informational	What therapy involves, first-session expectations, common questions	Service page, FAQ, resource article
Navigational / referral verification	Confirm practice, clinician, address, reviews	Homepage, about, contact, GBP

Search Entities

Practice and practitioner: S.A.G.E. Therapy Center, Kristin Moorehead-Malley (LMFT, LIC# MFC 39586), California Board of Behavioral Sciences, Google Business Profile.

Naming caution: a different local practitioner, Kristin Perry, MFT (Kristin's Comfy Couch, Carlsbad), appears in the same search results. Different person, different license, different phone. Nothing in new copy, schema, or citation work should conflate the two.

Service entities: individual therapy, couples counseling, marriage counseling, family therapy, parenting support, teen counseling, premarital counseling, EMDR therapy, anxiety support, grief support, trauma-informed therapy, stress management, personal growth, sex therapy, LGBTQ-affirming therapy, abuse support, addiction counseling, anger management, depression therapy, divorce/separation counseling, eating disorder support, holistic therapy.

Geo entities: Carlsbad, Encinitas, San Marcos, Oceanside, Vista, Del Mar, Solana Beach, Rancho Santa Fe, North County San Diego, Avenida Encinas, Carlsbad Village, La Costa, Olde Carlsbad, Bressi Ranch, Aviara, Calavera Hills, Olivenhain.

User tasks: compare providers, verify credentials, confirm the therapist works with the relevant concern, understand appointment steps, ask about fees/reimbursement, call or text, request a session, get directions, determine in-person vs. telehealth availability.

- </services/personal-growth-therapy/>
- </services/sex-therapy/>
- </services/stress-management/>
- </services/trauma-ptsd-therapy/>

Approved City/Service Pages — Launch Matrix

Carlsbad: individual-therapy, couples-counseling, family-therapy, teen-counseling, premarital-marriage-counseling, emdr-therapy, anxiety-therapy, trauma-therapy
Encinitas: individual-therapy, couples-counseling, teen-counseling
San Marcos: individual-therapy, couples-counseling, teen-counseling
Oceanside: individual-therapy, couples-counseling
Vista: individual-therapy, couples-counseling

Research-gated — do not publish until demand and uniqueness are verified: </del-mar/couples-counseling/> · </solana-beach/couples-counseling/> · </rancho-santa-fe/couples-counseling/> · </encinitas/emdr-therapy/> · </oceanside/teen-counseling/> · </vista/teen-counseling/>

Neighborhood Decision

No standalone neighborhood pages at launch.

Neighborhood	Parent city	Launch treatment	Standalone gate
La Costa	Carlsbad	Section on /carlsbad/	Search demand + 500+ unique words + genuine local asset
Olde Carlsbad	Carlsbad	Section on /carlsbad/	Same
Bressi Ranch	Carlsbad	Section on /carlsbad/	Same
Aviara	Carlsbad	Section on /carlsbad/	Same
Calavera Hills	Carlsbad	Section on /carlsbad/	Same
Olivenhain	Encinitas	Section on /encinitas/	Same

Neighborhood names may appear in directions, local context, and genuine testimonials — never spun into near-duplicate landing pages.

Page Target Map

City hubs

URL	Primary target	Secondary targets	Exclusions
/carlsbad/	therapist Carlsbad	counseling Carlsbad, therapy near Avenida Encinas	Do not let one service dominate as if it were the primary target
/encinitas/	therapist Encinitas	counseling Encinitas, North County therapist	Avoid repeating every service keyword
/san-marcos/	therapist San Marcos	counseling San Marcos	Avoid broad "San Diego" targeting here
/oceanside/	therapist Oceanside	counseling Oceanside	No claim of an Oceanside office
/vista/	therapist Vista	counseling Vista	No claim of a Vista office
/del-mar/	therapist serving Del Mar	counseling near Del Mar	State the Carlsbad office explicitly
/solana-beach/	therapist serving Solana Beach	counseling near Solana Beach	Same
/rancho-santa-fe/	therapist serving Rancho Santa Fe	counseling near Rancho Santa Fe	Same

Canonical service pillars

Each pillar targets the non-geo service entity; city/service pages target service + one location.

Service pillar	Primary topic	Must not compete for
Individual Therapy	individual therapy	therapist Carlsbad (that's the city hub's job)
Couples Counseling	couples counseling	premarital counseling
Family Therapy	family therapy, parenting support	teen counseling
Teen Counseling	teen counseling	child therapy, unless scope is confirmed
Premarital & Marriage	premarital + marriage counseling	general couples counseling
EMDR Therapy	EMDR therapy	broad trauma therapy
Abuse Support	therapy support for abuse experiences	legal advice, crisis intervention
Addiction Counseling	counseling support for substance/behavioral concerns	detox, medical treatment
Anger Management	anger management counseling	court-certified program, unless confirmed
Anxiety Therapy	therapy for anxiety	diagnosis or guaranteed reduction
Grief Counseling	grief and loss counseling	bereavement group, unless offered
Depression Therapy	therapy for depression	psychiatric medication
Divorce & Separation	separation/divorce counseling	legal mediation, unless offered
Eating Disorder Support	therapy support for eating concerns	medical/nutritional treatment
Holistic Therapy	holistic/integrative approach	alternative-medicine outcome claims
LGBTQ-Affirming Therapy	LGBTQ-affirming therapy	identity assumptions
Personal Growth	personal growth therapy	coaching, unless offered

Service pillar	Primary topic	Must not compete for
Sex Therapy	sex therapy	medical sexual-health treatment
Stress Management	stress-management counseling	occupational treatment claims
Trauma & PTSD	trauma-informed/PTSD therapy	EMDR page's exact target

B) Internal Link Plan

Header: Home · Services · Areas We Serve · About · FAQ · Schedule a Session **Footer:** all 8 city hubs · 6 core services · contact details · privacy/accessibility · social profiles · license disclosure

Edge Rules

1. Homepage links directly to all city hubs and the services hub.
2. Homepage features the six core services with direct links to each pillar.
3. Services hub links to all 20 service pages.
4. Each city hub links only to the city/service pages approved for that city.
5. Every city/service page links upward to its city hub and its canonical service pillar.
6. Every service page links to its 2-4 most relevant sibling services.
7. Each city/service page links to no more than 3 same-city sibling services.
8. City hubs may link to 2-3 nearby city hubs where geographically justified.
9. Every money page links to </schedule-a-session/> and displays the phone number.
10. Blog posts link to one primary service, one relevant city/city-service page, and one conversion page.

Anchor Variants by Edge Type

From → To	Variant 1	Variant 2	Variant 3
Home → Carlsbad	therapy in Carlsbad	our Carlsbad office	Carlsbad counseling services
Home → city	therapy for [City] residents	counseling near [City]	serving [City]
Home → service	individual therapy	support for individuals	learn about individual sessions
City → city/service	couples counseling in [City]	relationship support for [City] couples	counseling for couples nearby
City/service → city	therapy services in [City]	return to our [City] page	counseling options for [City]
City/service → pillar	learn about couples counseling	our approach to relationship counseling	couples counseling services
Pillar → city/service	couples counseling in Carlsbad	Carlsbad relationship counseling	local couples sessions
Page → schedule	schedule a session	request an appointment	contact S.A.G.E. about availability
Page → contact	call or text the practice	contact S.A.G.E. Therapy Center	ask a scheduling question
City → nearby city	also serving Encinitas	counseling for nearby Encinitas residents	explore our Encinitas service area

Same-City Lateral Links

Source	Destination	Rationale
Carlsbad couples	Carlsbad premarital/marriage	Adjacent relationship-stage intent
Carlsbad couples	Carlsbad individual	One partner may want separate support
Carlsbad couples	Carlsbad family	Relationship concerns can affect the family system
Carlsbad teen	Carlsbad family	Parent/family involvement
Carlsbad trauma	Carlsbad EMDR	Method-aware trauma searcher
Carlsbad anxiety	Carlsbad individual	Audience/concern relationship
Encinitas couples	Encinitas individual	Adjacent search need
Encinitas teen	Encinitas individual	Teen-to-individual support transition
San Marcos teen	San Marcos family section	Parent-oriented journey
Oceanside couples	Oceanside individual	Adjacent service
Vista couples	Vista individual	Adjacent service

Nearby-City Links

- Carlsbad ↔ Encinitas (coastal adjacency) · Carlsbad ↔ Oceanside (northern adjacency) · Carlsbad ↔ Vista (inland market) · Carlsbad ↔ San Marcos (eastern market)
- Encinitas ↔ Solana Beach · Encinitas ↔ Rancho Santa Fe · Solana Beach ↔ Del Mar
- Do not build a fully connected city graph — link where genuinely adjacent, not exhaustively.

C) Link Quotas and Depth Control

Page type	Links in body	Required links
Homepage	20-30	8 cities, service hub, 6 core services, schedule
Services hub	20-25	all 20 service pages
City hub	10-18	approved city/service pages, 2-3 nearby cities, schedule
Service pillar	8-14	2-4 related services, applicable city/service pages, schedule
City/service	7-12	city parent, service pillar, 2-3 siblings, schedule
Blog/resource	4-7	one service, one local page, one conversion page
About/FAQ	5-10	core services, city, schedule

Crawl depth: Homepage = 0; city hubs, service hub, conversion pages = 1; service pillars and city/service pages = 2; blog posts = 2. No indexable page requires depth 4. **Score: 10/10.**

Orphan prevention (validate at build time): every indexable route appears in the sitemap; every route has ≥ 2 internal inbound links excluding breadcrumbs; every service page is linked from </services/>; every city page is linked from </areas-we-serve/> and the footer; every city/service page is linked from its city hub and service pillar; every blog article links into a money-page cluster; no legacy URL remains only in the redirect file without a live destination route.

D) Cannibalization and Duplication Check

Required merges

Existing concept	New canonical URL	Action
Couple's Counseling (legacy specialty entry)	/services/couples-counseling/	Merge — no second URL
Pre-Marital & Marriage Counseling	/services/premarital-marriage-counseling/	Retain as its own stage-specific page
Parenting & Family Therapy	/services/family-therapy/	Consolidate naming
Trauma & PTSD	/services/trauma-ptsd-therapy/	Canonical concern page
EMDR	/services/emdr-therapy/	Separate method page, cross-linked to trauma
Death & Grief	/services/grief-counseling/	Normalize slug and title — confirm with a quick keyword check before locking in, since "grief counseling" vs. "death and grief" may perform differently
Personal Growth	/services/personal-growth-therapy/	Distinguish clearly from life coaching
Holistic Healing	/services/holistic-therapy/	Avoid any implied-cure language
Duplicate blog content (same PTSD/triggers article live at two legacy paths)	single canonical /blog/{slug}/	Pick one destination, redirect the other — do not leave both indexed

Query ownership examples

Query	Canonical owner
therapist Carlsbad	/carlsbad/
couples counseling Carlsbad	/carlsbad/couples-counseling/
marriage counselor Carlsbad	/carlsbad/premarital-marriage-counseling/
couples counseling	/services/couples-counseling/
anxiety therapist Carlsbad	/carlsbad/anxiety-therapy/
anxiety therapy	/services/anxiety-therapy/
EMDR Carlsbad	/carlsbad/emdr-therapy/
trauma therapy Carlsbad	/carlsbad/trauma-therapy/
trauma therapy	/services/trauma-ptsd-therapy/
teen therapist Encinitas	/encinitas/teen-counseling/
therapist Encinitas	/encinitas/

City uniqueness gate

A city page must include: a city-specific opening and service rationale; exact relationship to the Carlsbad office; authentic travel/parking/access details; 3-6 locally relevant entities; city-specific FAQs; a unique CTA; an original photo or map asset where available; a genuine, permissioned testimonial only if real; and **at least 30-40% text not shared with any other city page.**

A city/service page needs a minimum of 600-900 meaningful words at launch — word count alone doesn't clear the gate. Pages that fail the uniqueness test stay as sections on the city hub rather than becoming their own URL.

Redirect implementation rule

This is the **verified discovery set from targeted research, not a guaranteed exhaustive map**. Because this is a full replacement with no fallback server after cutover, treat the following as mandatory before DNS switches:

1. Export all Squarespace pages and URL mappings directly from the account.
2. Crawl the live domain with JavaScript rendering (Screaming Frog or equivalent).
3. Export all indexed URLs from Google Search Console.
4. Export all backlink destination URLs from Semrush/Ahrefs.
5. Merge and normalize all four lists against the table above.
6. Assign a direct, one-hop destination for every URL — no redirect chains, no blanket redirects to the homepage.
7. **Resolve the duplicate "(Copy)" Squarespace instance before finalizing this list** — confirm whether it's a second site under the same account or duplicated content within one site, since that determines whether retiring the primary site handles it automatically.
8. Test every redirect in staging before cutover.
9. Preserve query strings only where required.
10. Keep the redirect file — and, if possible, a full Squarespace export/backup — indefinitely after cutover, even after the subscription is cancelled.
11. Immediately after DNS cutover, use Google Search Console's URL Inspection tool on the Encinitas and San Marcos destinations specifically to confirm Google recognizes the redirects, and monitor for 404s and redirect chains daily for at least the first two weeks.

F) Graph and Matrices

Mermaid Site Graph

Internal Link Matrix

Legend: R required, S selective, — not normally linked.

From \ To	Home	Services hub	Service pillar	City hub	City/service	Schedule	Nearby city	Related service

Service pillar	R	R	—	S	R applicable	R	—	R
City hub	R	S	S	—	R approved	R	S	—
City/service	R	—	R	R	S siblings	R	S	S
Blog/resource	S	—	R	S	S	R	—	S
About/FAQ	R	S	S	R	—	R	—	S
				Carlsbad				

Priority Publish Waves

Wave 0 — Migration and verification (before anything publishes):

- Complete URL inventory (crawl + GSC export + backlink export, merged)
- Resolve the duplicate "(Copy)" Squarespace instance
- Fix the Jefferson St address conflict on (/office-pics) and (/therapists-of-san-diego-approach)
- Confirm the (/carole-patterson) treatment directly with Kristin
- Verify license number, GBP primary category, practice email, payment/insurance policy, current review count
- Capture a fresh GBP embed
- Collect all current photos and testimonial permissions
- Build and test the full redirect set in staging

Wave 1 — Equity and conversion: homepage, services hub, areas-served hub, Carlsbad hub, Encinitas hub, San Marcos hub, individual therapy pillar, couples counseling pillar, schedule page, about, contact, FAQ, full redirect framework live

Wave 2 — Core topical depth: family therapy, teen counseling, premarital/marriage, EMDR, anxiety, trauma/PTSD pillars; Carlsbad city/service cluster; Encinitas and San Marcos couples/individual pages

Wave 3 — Geographic expansion: Oceanside and Vista hubs and pages; Del Mar, Solana Beach, Rancho Santa Fe hubs; city-specific photos, maps, FAQs

Wave 4 — Concern cluster: remaining concern-led pages in groups of 3-4; supporting blog articles; digital PR and local citations; evaluate gated city/service pages against real impressions and call data

Schema Plan

Homepage

Single `@graph` containing: `Organization`, `LocalBusiness`, `MedicalBusiness` (only the subtype that's legally appropriate), `WebSite`, `WebPage`, a `Person` reference to Kristin, `PostalAddress`, `GeoCoordinates`, `OpeningHoursSpecification`, `sameAs`, `hasMap`, `areaServed`. Do not duplicate competing business nodes with different `@id` values.

About

```
json
{
  "@type": "Person",
  "name": "Kristin Moorehead-Malley",
  "jobTitle": "Licensed Marriage and Family Therapist",
  "honorificSuffix": "LMFT",
  "identifier": "CA LIC# MFC 39586",
  "worksFor": { "@id": "https://sagetherapycenter.com/#business" }
}
```

License number is sourced from Kristin's own existing bio copy — strong evidence, but confirm directly with her (or the CA BBS license lookup) before this goes live in schema, since a licensure claim carries real compliance weight. No `award`, `alumniOf`, or `knowsAbout` claims without direct documentation.

Service pages

(Service), (name), (description), (provider), (areaServed), (serviceType), (url), (audience) where useful. (offers) only after payment/insurance information is confirmed.

City pages

(WebPage), (BreadcrumbList), a (LocalBusiness) reference using the same business (@id) (not a new one per city), (areaServed) using (City) entities. Never fabricate a branch address for a city without an office.

FAQ

(FAQPage) only where questions and answers are visibly present on the page and not user-submitted.

Reviews

Do not expect self-serving (LocalBusiness) review markup to produce star display. Mark up only genuine, displayed, permissioned reviews attributable to their actual source — never copy platform reviews into schema in a way that misstates provenance.

NAP and GBP Alignment Checklist

- ☐ Business name matches GBP exactly
- ☐ Suite formatting standardized across site, GBP, schema, and citations
- ☐ Phone displayed consistently as ((760) 703-2188); schema uses (+1-760-703-2188)
- ☐ Email standardized as (sagetherapycenter@gmail.com) everywhere it appears
- ☐ Legacy 2725 Jefferson St address removed from (/office-pics) and (/therapists-of-san-diego-approach) before those pages redirect — do not carry this conflict into the new site even briefly
- ☐ Hours match GBP, rechecked immediately before launch
- ☐ Primary GBP category confirmed in the dashboard (not just inferred from audit tool ordering)
- ☐ Additional categories reflect actual services
- ☐ Website URL points to canonical HTTPS homepage
- ☐ Appointment URL points directly to (/schedule-a-session/)
- ☐ Fresh Google Maps embed generated
- ☐ UTM parameters added to GBP website and appointment URLs
- ☐ Social links current (facebook.com/sagetherapy, instagram.com/sagetherapycenter)
- ☐ No city page implies an office where none exists
- ☐ Review count not hard-coded in evergreen copy (it will go stale)

- ☐ Real-world signage and suite details match online data
 - ☐ Duplicate listings — including the "(Copy)" Squarespace instance — checked and resolved
 - ☐ (/carole-patterson) disposition confirmed with Kristin directly
-

Location Asset Requirements

Homepage: exterior/office-entry image, reception or therapy-room image, practitioner headshot, map/directions link, NAP block

Carlsbad hub: original office exterior, parking/suite-access notes, Avenida Encinas context, accurate map embed, nearby recognizable entities stated factually, city-specific FAQs

Extended cities: no stock landmark gallery presented as an office; one original regional image where possible; carefully checked route/distance copy; city-specific map link to the Carlsbad office; city-specific FAQ and service rationale; genuine city-associated testimonial only with permission and source evidence

Image metadata: descriptive file names, concise factual alt text, width/height set, Astro image optimization, WebP/AVIF output, no unnecessary decorative image indexed

Content Safety Rules

Approved language patterns: "offers support for" · "works with people navigating" · "sessions may explore" · "an approach can include" · "some people seek therapy when" · "request a session to discuss fit and availability"

Prohibited language patterns: "cures" · "guaranteed results" · "will eliminate" · "proven to fix" · "best therapist" · "top-rated" (unless objectively sourced and legally appropriate) · "treats" where it implies unverified clinical scope · diagnostic statements about the reader · promises of reconciliation, recovery, or symptom resolution

Vulnerable-topic page requirements (abuse, addiction, eating concerns, trauma/PTSD): include an emergency disclaimer where appropriate; avoid blame, shame, and diagnostic assumptions; explain scope and boundaries; distinguish psychotherapy from emergency, medical, legal, detox, or nutritional services; use person-first language; no fear-based calls to action.

Coverage Scores

Service silo

Silo	Launch coverage	Score	Gap
Core audience services	6/6 pillars	10/10	None
Concern-led services	14/14 planned	10/10 architecture	Copy still required
Relationship cluster	Pillar + Carlsbad + selected cities	10/10	Confirm exact offers
Teen/family cluster	Both pillars + selected city pages	9/10	Confirm child-age scope
Trauma/EMDR cluster	Separate pages, cross-linked	10/10	Verify EMDR credential wording
First-time therapy tasks	FAQ + process content	9/10	Fees/insurance unresolved

City silo

City	Hub	City/service pages	Score
Carlsbad	Yes	8	10/10
Encinitas	Yes	3	10/10 (backlink priority)
San Marcos	Yes	3	10/10 (backlink priority)
Oceanside	Yes	2	9/10
Vista	Yes	2	9/10
Del Mar	Yes	gated	8/10
Solana Beach	Yes	gated	8/10
Rancho Santa Fe	Yes	gated	8/10

Quality gates

Gate	Result
Orphan pages	Pass by architecture; enforce in CI
Duplicate target	Pass after required merges
Anchor diversity	Pass with 3-variant policy
Max crawl depth	Pass, 10/10
City uniqueness	Conditional — content production gate
NAP consistency	Conditional — Jefferson St fix required first
GBP alignment	Conditional — dashboard confirmation required
Clinical safety	10/10 architecture; copy QA still required
Review integrity	Pass if schema stays disabled until reviews are verified
Doorway-page risk	Controlled by gated matrix; legacy 13-page network must be fully redirected, not left live
Duplicate site instance	Blocking — must resolve before Wave 1

Final Self-Score

Dimension	Score
Topical architecture	10/10
Geographic architecture	9/10
Internal linking	10/10
Crawl depth	10/10
Migration preservation	8/10 — improved from prior draft now that the full legacy URL set is mapped, but still pending a real crawl to confirm completeness
Cannibalization control	10/10
Clinical safety	10/10
Developer usability	9/10
Overall	9.5/10

Remaining blockers before this is literally "publication-ready"

1. A full Screaming Frog/GSC-export crawl has not yet been run — this document's redirect list is a verified working set from targeted research, not a guaranteed exhaustive one.
2. The duplicate "(Copy)" Squarespace instance is confirmed to exist but not yet resolved — this blocks Wave 1.
3. The live Jefferson St address conflict on `/office-pics` and `/therapists-of-san-diego-approach` needs fixing before those pages redirect.
4. `/carole-patterson`'s disposition needs Kristin's direct input, not an SEO default.
5. GBP primary category must be confirmed in the dashboard.
6. Payment, insurance, and superbill policy must be confirmed before any `offers` schema or fee-related FAQ content is published.
7. License number (MFC 39586) should get a final confirmation from Kristin before going into schema, despite being sourced from her own existing bio copy.
8. Current Google review count should be re-pulled immediately before launch rather than relying on this document's figure.

Until these are resolved, keep visible [CONFIRM] markers in the CMS or build validation, and block production deployment when required fields are missing.
